

Ocufofin[®] proactive

Active support for the maintenance of vision

Supplement your diet with a formulation that has been tested in studies and contains valuable micronutrients.

Healthy eyes for a lifetime

In everyday life, risk factors can impair health, especially of the eyes, and lead to the development of chronic changes without being noticed. A high concentration of reactive oxygen species impairs the transport and conversion of nutrients (oxidative stress).

The body is dependent on a sufficient supply of micronutrients for the optimal functioning of all processes, especially the eyes.

By taking one capsule of Ocufolin[®] proactive daily, you support your eyesight and protect your cells from oxidative stress.

All ingredients have been tested in large long-term studies in the USA and France involving several thousand people. The particular importance of the B vitamins, especially folate, was highlighted ¹.

The unique composition of bioavailable nutrients contained in **Ocufolin[®] proactive** is well absorbed and well tolerated by the body:

- Zinc and copper
- Vitamins C, D and E
- The carotenoids lutein and zeaxanthin
- The B vitamins B1, B2, B5, B6 and B12
- In particular L-methylfolate (B9)

An optimal folate level in the blood offers special protection².

If the light-sensitive visual cells (photoreceptors) are not well supplied, even glasses or contact lenses no longer help. The photoreceptors cannot be regenerated.

Ocufolin proactive was developed by ophthalmologists and has been used successfully for several years.

Ocufolin® proactive

Ocufolin® proactive contains L-methylfolate calcium, the bioactive form of folic acid. Active folate is important to proactively prevent genetic, age-related or nutritional deficiencies.

With just one capsule of Ocufolin® proactive a day, you can cover your additional requirements for a wide range of important vitamins and micronutrients.

Ingredient	per capsule	% NRV*	per 100 g
Vitamin C	40 mg	50%	4.37 g
Vitamin B1	0.55 mg	50%	0.06 g
Vitamin B2	4.2 mg	300%	0.46 g
Vitamin B6	2.1 mg	150%	0.23 g
Vitamin B12	9 µg	360%	0.001 g
Vitamin B5	3 mg	50%	0.33 g
Vitamin E	3 mg	25%	0.33 g
Vitamin D3	20 µg	400%	0.002 g
Lutein	10 mg	n.d.*	1.09 g
Zeaxanthin	2 mg	n.d.*	0.22 g
N-acetyl-L-cysteine	100 mg	n.d.*	10.93 g
Selenium	20 µg	36%	0.002 g
Zinc	5 mg	50%	0.55 g
Copper	300 µg	30%	0.033 g
L-methyl folate calcium	600 µg	266%	0.07 g

*RI = Reference Intake / *n.d. = not defined

Available in a 3-month pack with 90 capsules, blistered.
